

# How Sweet it is

## Nature's Life

# Policosanol 23 mg

**The natural solution for healthy cholesterol** – Policosanol 23 mg is a mixture of organic compounds called aliphatic alcohols derived from sugar cane wax. It may be one of the most exciting discoveries for promoting cholesterol health. Studies show that policosanol is unique because it not only inhibits the liver's production of LDL (“bad”) but also assists in raising HDL (“good”) levels.\* Cardiologists agree that lowering LDL cholesterol and raising HDL cholesterol increases overall cardiovascular health.\*

### How is Nature's Life Policosanol different?

- Innovative, easy to swallow “pellet” tablets - 1 per day
- Derived from sugar cane wax—the same source used by policosanol researchers
- 23 mg dosage meets or exceeds aliphatic alcohol profile used in clinical trials
- 2 months supply in every package
- Lowers “bad” LDL and increases “good” HDL\*

60 Tablets  
2 month supply  
Code 237

## Why sugar cane wax policosanol?

**Science**— Policosanol from sugar cane wax has been extensively studied in nearly 30,000 people through short-term, and randomized, placebo-controlled trials. It is believed to help maintain normal cholesterol production in the liver and to promote normal cholesterol uptake by the body tissues. Powerful antioxidant capabilities inhibit oxidation of cholesterol\*

**Safety** —Peer reviewed clinical trials have shown policosanol to be safe and effective. In fact, in some trials, policosanol users reported fewer adverse effects than those taking a placebo!

### Nature's Life Policosanol Aliphatic Alcohol Profile:

Meets or exceeds levels used in clinical trials

|                      |     |
|----------------------|-----|
| Tetracosanol .....   | 1%  |
| Hexacosanol .....    | 16% |
| Octacosanol .....    | 52% |
| Triacosanol .....    | 22% |
| Dotriacontanol ..... | 1%  |
